

EXTRA VIRGIN OLIVE OIL TECHNICAL DATA SHEET

*'The Spanish Liquid Gold and
Medicine Food'.*

*'Spain, the largest producer of olive
oil in the world'.*

*'Commodity and everyday product
of the Mediterranean Diet'.*

'The healthiest fat you can eat'.

Extra Virgin Olive Oil is the juice obtained exclusively by pressing the olives, the fruit of the olive tree and used in cooking, medicine, pharmaceuticals or cosmetics.

In order to obtain a product of the highest quality, just like our extra virgin olive oils, all the process of extraction must be accomplished with special care, watching each and every stage and respecting the timings advised by the experience after many years of work and by the know-how inherited from our olive oil culture over generations. From that careful process, which is completely natural, we obtain our extra virgin olive oils.
